```

- 上网查找解决方案如下

`std::gets` has been removed in C++11 (See [What is gets\(\) equivalent in C11?](#))

8

If you're building using C++11 flag (maybe with a g++ alias), you have to disable this line in `systemc.h`.

Replace

```
using std::gets;
```

with

```
#if defined(__cplusplus) && (__cplusplus < 201103L)
using std::gets;
#endif
```

3.实验心得

这次实验也是主要照着ppt的提示完成就ok了，遇到的问题也就是最后一步的build由于系统自带gcc版本较高无法识别出systemc库中的std::gets导致的编译失败，所以只要将std::gets给相应注释掉就OK了。

然后是排版的问题，由于在markdown中并不支持图片的直接修改大小，一般都是用html语句进行兼容执行，同时由于无法通过markdown的修改直接看到所导出的pdf具体排版，所以我也只能随机地导出，结果就是导致了pdf的图片排版很不好，目前还找不到什么方法来有效快捷的让pdf的排版也同时顾及到。
